ten

# zero

Start on top and around you go.  
That's how you make the number zero.

# one

Number one is like a stick –  
a straight line that's really quick.

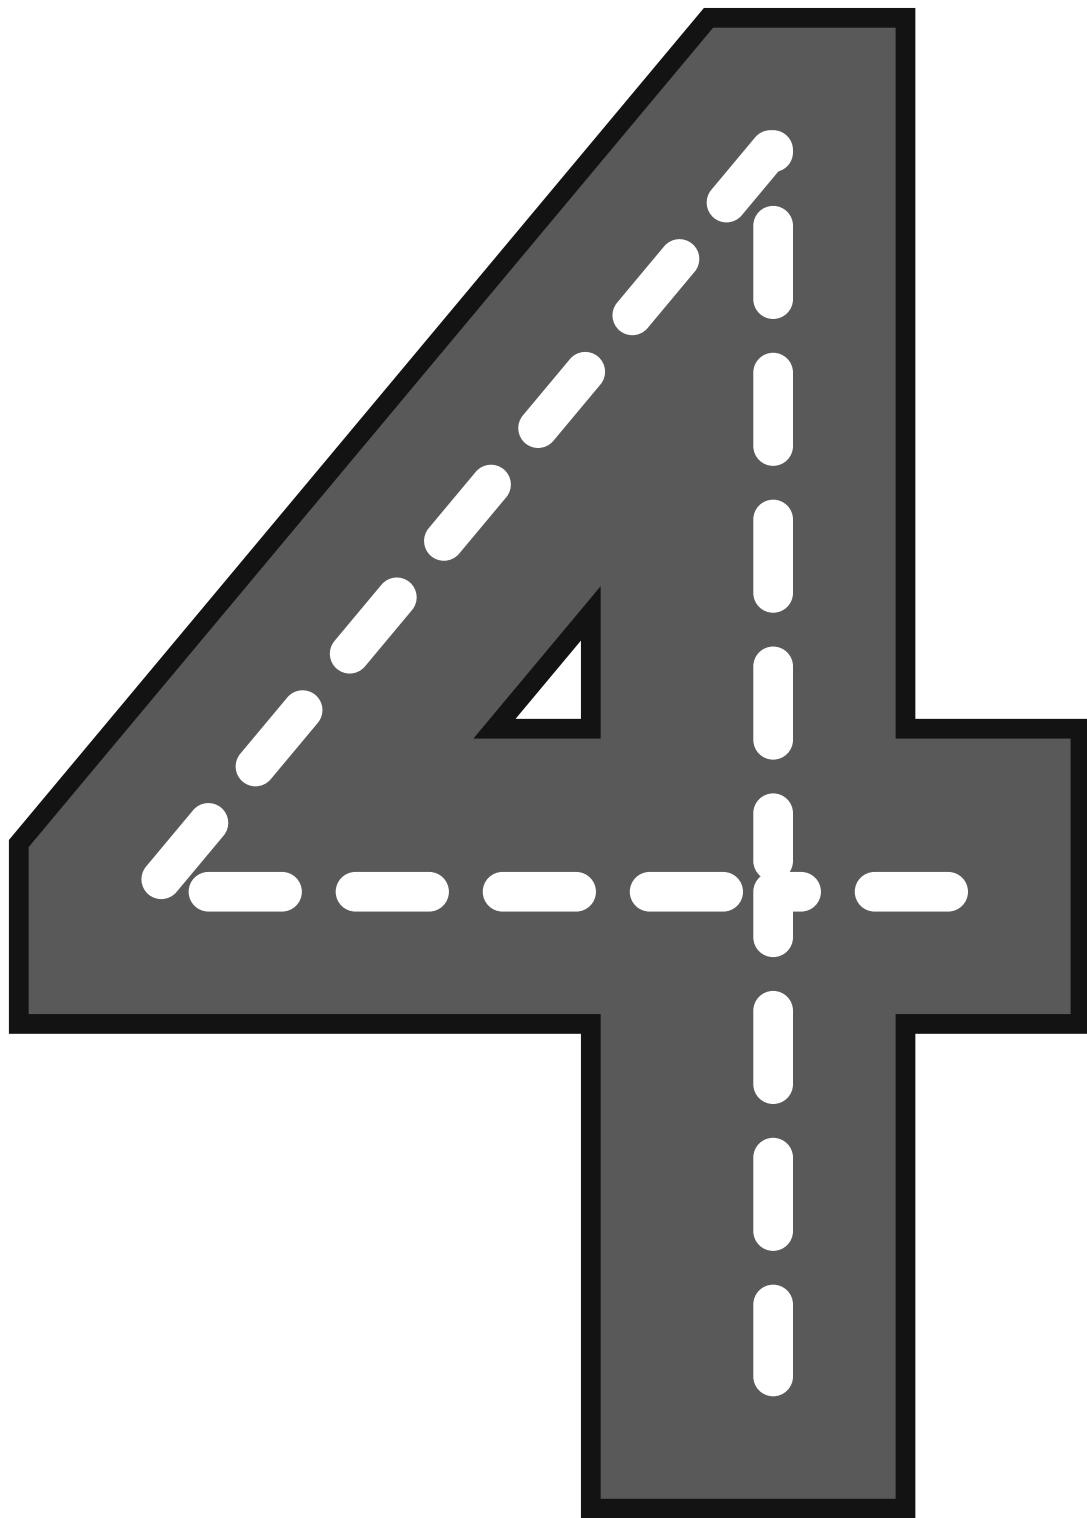

# two

For number two, go around and back.  
Then make a line like a railroad track.

# three

Go around one time, what will it be?  
Go around again, that's number three.

# four

Down, across, and down once more.  
That's the way you make a four!

# five

Straight down and around, then you stop.  
Finish the five with a line on top.

# six

There are two tricks to make a six.  
Make one big hoop, and then a loop.
